Half the world's population now lives in cities. Governments and international development agencies have made housing the urban poor a priority, but few focus on women's needs. Based on research conducted in Ahmedabad in collaboration with the Self-Employed Women's Association (SEWA), this book maps the constraints and opportunities that low-income women throughout the Global South face in securing property, which remains overwhelmingly in male hands. Their experiences and vulnerabilities open a window to assess not only land tenure and property laws but also potential solutions such as microcredit financing and diverse theoretical approaches to gender and development.

Growth miracles typically have been studied at the country level. In The Making of Miracles in Indian States, internationally-renowned economists Arvind Panagariya and M. Govinda Rao bring together a team of six leading scholars to break from that tradition and study three growth miracles in India at the level of the state: Andhra Pradesh, Bihar, and Gujarat. These are three large and diverse states in India: Gujarat has the third-highest per-capita income among the largest eighteen states, Bihar is the poorest, and Andhra Pradesh falls in the middle. Despite vast differences among the states, all three have grown at rates exceeding 8% for an entire decade in the twenty-first century. Each section of this three-part book offers a historical perspective on the state's development and the specific factors that improved its economic fortunes. The three case studies are backed by extensive quantitative documentation. They demonstrate the critical role that leadership, translated into improved policies and implementation, plays in stimulating growth and development. The Making of Miracles in Indian States is essential reading for students and scholars alike, as well as policy makers, NGO workers, and employees of international institutions.

'Among all the literature on participation, this is the first book I know that focuses on municipal authorities. It... also has particular importance both for higher levels of government (at national or provincial/state level) and for international agencies. Firstly, it is a reminder of the importance of well-functioning municipal governments for reducing poverty. Secondly, it is a rich source of case studies and analysis about how municipal authorities can incorporate one central component of 'good governance' - a permanent, participatory engagement with their citizens' From the Foreword by David Satterthwaite, Director, Human Settlements Programme, International Institute for Environment and Development Increasingly, governments and donors are advocating the participation of poor communities in the delivery of urban services and infrastructure. Yet local authorities responsible for implementing participatory policies often do not have the skills, organisations or resources needed, or an adequate idea of the capacity required. This sourcebook provides invaluable practical guidance for municipal officials, and others working in urban development and poverty reduction, on the range of issues to be addressed in planning and managing cities with community participation. It explains the key elements of participation, identifies common constraints and opportunities, describes the vehicles for moving participation forward and outlines the capacity building needed for a municipality to achieve participatory goals.

Using case studies from Ahmedabad, Kolkata, Jaipur, and Bangalore,this book examines the causes of poor public service delivery in India scities with specific reference to finances and institutional factors.

This book highlights the electronic governance in a smart city through case studies of cities located in many countries. "E-Government" refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts. • E-Governance State of the Art Studies of many cities • E-Governance Domains Studies • E-Governance Tools and Issues

Metropolitan Governance is an indispensable book for understanding the governance of metropolitan cities. The book covers an insight into the governance in Ahmedabad and Hyderabad. The participatory metropolitan governance is also of interest to the students of sociology, social work and geography. The students of public administration would find it useful to study the decentralisation of powers from centre to state to local level government. For academicians engaged in service delivery in metropolitan areas, it brings in clarity regarding role of varied stakeholders in governance.

The book offers a concise yet comprehensive understanding of real estate finance in India. The central themes of this book are functioning, instruments, and decision analysis related to home loans and residential mortgage banking. These themes are also extended to commercial real estate borrowing and secondary markets. The chapters are organized to offer practically useful and theoretically sound knowledge of real estate finance. Realistic scenarios, examples, expert opinions, illustrations, and, most importantly, hands-on financial exercises are extensively used to offer a concrete knowledge of the intricacies of real estate finance. The book systematically progresses from basic financial concepts to more complex discussions (such as exotic home loan types and their analysis). Beyond solved examples, the book also offers practice problems with answers so that a reader understands the financial instruments. PowerPoint presentations for the various chapters will be useful for instructors. Real estate investors (institutional or individuals), academics, students, professionals, and generalist real estate enthusiasts will find the book useful for their learning and real-life applications.

In everyday practice, private and common property relations often accommodate a wide variety of demands made by the owners and users of land. In a stark contrast, many theories of property and land policy fail to recognize plural property relations. The polyrational theory of planning and property as employed in this book reconciles practice and theory. With international examples, this is a valuable resource for those concerned with town planning, land reform, land use and human rights.

The future of government as we know it is being shaped by the quickly-advancing progression of information and communication technology (ICT) eGovernment systems. eGov presents major challenges and advantages for policy makers and the public alike.
