Qualified personnel must complete all work. Do not apply power to the Type II Vipros 358 King until an A.E.S.I. (Amada Engineering and Service Incorporated) Engineer is present and has instructed you to do so. Considerable effort has been made to ensure that this manual is free of inaccuracies and omissions.

~~Leader~~

The Vipros 358 King requires two electrical power sources. The first power source is supplied to the Fanuc 04PC control. The Fanuc 04PC control should be supplied from a power line separate from those used for welding machines or other machines that produce electrical noise. The second source is connected to the SBC-5.5 chiller.
