The authors point out the entire business orientated automotive value chain. With regard to the finance perspective these elements of the value chain are scrutinized chapter by chapter. Current trends in new mobility concepts, cross-industry strategic alliances as well as requirements for product launch, especially in the BRIC countries, are highlighted. The book provides the link between science and business practice in the automotive industry. It can be used as a textbook. Many practitioners might also use it as a guideline in the field of automotive management.

Do we aggressively reward and promote the people who have the biggest impact on creating excellent Process Integration for Automotive Finance Applications services/products? Who will be responsible for making the decisions to include or exclude requested changes once Process Integration for Automotive Finance Applications is underway? As part of the Annual Survey of the American Bar Association, this article surveys the most important federal and state regulatory developments affecting automotive finance over the last year, among them (1) a fair lending consent order among the CFPB, the Department of Justice, and Ally financial entities; (2) a consent order between the Federal Trade Commission and Consumer Portfolio Services, Inc.; and (3) a preliminary injunction granted to the New York Superintendent of Financial Services against Condor Capital Corporation.

The book “Supply Chain Finance Solutions” offers orientation in the new discipline of Supply Chain Finance (SCF) by investigating the need for and nature of SCF, along with its characteristics and enablers. Due to the novelty of the Supply Chain Finance approach, there are still many knowledge gaps. This lack of research leads to uncertainties about the successful implementation of SCF solutions within companies as there is little quantified evidence on the achievable cost savings and other potential benefits. The authors close this gap by providing the latest information on business concepts and the SCF market. Based on a sample SCF model, the worldwide market size for such solutions and potential cost savings to companies engaged in SCF are analyzed. The work underlines the generally agreed-upon attractiveness and future relevance of SCF solutions by creating win-win

situations; for all actors in the end-to-end supply chain as well as for external service providers.

Almost every aspect of the life cycle of retail contract and lease transactions, from marketing and account originations to servicing and collections, has received heightened regulatory attention during the past year (2015), since our previous Survey. This Survey highlights the most significant developments since the spring of 2015, including the Bureau of Consumer Financial Protection's ("CFPB") enactment of a larger market participant rule and the expansion of its Examination Procedures for automobile finance lenders. On the fair lending front, this Survey addresses consent orders entered by the U.S. Department of Justice ("DOJ") with American Honda Finance Corporation ("AHFC") and Evergreen Bank Group ("Evergreen"); the CFPB's white paper on the proxy methodology it uses in fair lending cases; and its announcement that consumers subject to alleged credit discrimination by Ally Financial, Inc. and Ally Bank ("Ally") will be receiving instructions on how to apply for restitution. On the servicing front, this Survey examines enforcement actions by the CFPB against First Investors Financial Services Group, Inc. ("First Investors") in connection with credit reporting activities and Security National Automotive Acceptances Company ("SNAAC") related to collection activities involving servicemembers. This survey also reports on the New York Attorney General's enforcement actions against vehicle dealers' with regard to their sale and financing of ancillary products.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting

sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Does it seem you've formulated a rock-solid strategy, yet your firm still can't get ahead? If so, construct a solid foundation for business execution—an IT infrastructure and digitized business processes to automate your company's core capabilities. In *Enterprise Architecture as Strategy: Creating a Foundation for Business Execution*, authors Jeanne W. Ross, Peter Weill, and David C. Robertson show you how. The key? Make tough decisions about which processes you must execute well, then implement the IT systems needed to digitize those processes. Citing numerous companies worldwide, the authors show how constructing the right enterprise architecture enhances profitability and time to market, improves strategy execution, and even lowers IT costs. Though clear, engaging explanation, they demonstrate how to define your operating model—your vision of how your firm will survive and grow—and implement it through your enterprise architecture. Their counterintuitive but vital message: when it comes to executing your strategy, your enterprise architecture may matter far more than your strategy itself.
