This book focuses in on the dominant role of SMEs (small and medium-sized enterprises) in the tourism and hospitality industry. It explores their impact on consumer perceptions of a destination, drawing on examples of small hotels, guesthouses, cafes and restaurants. It also highlights the challenges faced by SMEs to promote destination business growth - with discussion of competitiveness, quality and standards. With its entity-relationship model of a destination, this edited collection of international papers fully explores the dynamics SMEs. Case studies from around the world also puts SMEs research into a global context.

Venice's Secret Service is the untold and arresting story of the world's earliest centrally-organised state intelligence service. Long before the inception of SIS and the CIA, in the period of the Renaissance, the Republic of Venice had masterminded a remarkable centrally-organised state intelligence organisation that played a pivotal role in the defence of the Venetian empire. Housed in the imposing Doge's Palace and under the direction of the Council of Ten, the notorious governmental committee that acted as Venice's spy chiefs, this 'proto-modern' organisation served prominent intelligence functions including operations (intelligence and covert action), analysis, cryptography and steganography, cryptanalysis, and even the development of lethal substances. Official informants and amateur spies were shipped across Europe, Anatolia, and Northern Africa, conducting Venice's stealthy intelligence operations. Revealing a plethora of secrets, their keepers, and their seekers, Venice's Secret Service explores the social and managerial processes that enabled their existence and that furnished the foundation for an extraordinary intelligence organisation created by one of the early modern world's most cosmopolitan states.

Art historians have long looked to letters to secure biographical details; clarify relationships between artists and patrons; and present artists as modern, self-aware individuals. This book takes a novel approach: focusing on Albrecht Dürer, Shira Brisman is the first to argue that the experience of writing, sending, and receiving letters shaped how he treated the work of art as an agent for communication. In the early modern period, before the establishment of a reliable postal system, letters faced risks of interception and delay. During the Reformation, the printing press threatened to expose intimate exchanges and blur the line between public and private life. Exploring the complex travel patterns of sixteenth-century missives, Brisman explains how these issues of sending and receiving informed Dürer's artistic practices. His success, she contends, was due in large part to his development of pictorial strategies—an epistolary mode of address—marked by a direct, intimate appeal to the viewer, an appeal that also acknowledged the distance and delay that defers the message before it can reach its recipient. As images, often in the form of prints, coursed through an open market, and artists lost direct control over the sale and reception of their work, Germany's chief printmaker navigated the new terrain by creating in his images a balance between legibility and concealment, intimacy and public address.
