Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

This text draws on a range of expertise to share good practice and explore new ways of using appropriate technologies in assessment. It provides a strategic overview along with pragmatic proposals for the use of computers in assessment.

Autism is not a single disease but a syndrome of different diseases. In this completely reworked and updated third edition, two world authorities, Christopher Gillberg and Mary Coleman, address the difficulties this presents for clinical diagnosis with diagnostic aids and clear guidelines for medical evaluation. Epidemiology, neuropsychological studies and behavior complexes, such as self-injury, are reviewed in detail, and the authors give a detailed explanation of what is known about the molecular biology and genetics of autism. Epilepsy and electrophysiological studies are also covered, as well as biochemistry, endocrinology, immunology, brain imaging and neuropathology. The available medical therapies are reviewed, along with an update on what is known about other interventions, such as psychoeducational and behavioral modification procedures. The book concludes with an integration of current knowledge from diverse fields. This is an essential text for clinicians and will also be of interest to parents of autistic children.

This volume presents the proceedings of the Fourth International Workshop on Analogical and Inductive Inference (All '94) and the Fifth International Workshop on Algorithmic Learning Theory (ALT '94), held jointly at Reinhardbrunn Castle, Germany in October 1994. (In future the All and ALT workshops will be amalgamated and held under the single title of Algorithmic Learning Theory.) The book contains revised versions of 45 papers on all current aspects of computational learning theory; in particular, algorithmic learning, machine learning, analogical inference, inductive logic, case-based reasoning, and formal language learning are addressed.

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

This GCSE revision guide for English and English literature contains updated content in line with the latest curriculum changes. It has in-depth course coverage, with tips, key points and progress check panels. Sample questions with model answers are included.
