This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design,

characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. In the United States, we now take our ability to pay with plastic for granted. In other parts of the world, however, the establishment of a "credit-card economy" has not been easy. In countries without a history of economic stability, how can banks decide who should be given a credit card? How do markets convince people to use cards, make their transactions visible to authorities, assume the potential risk of fraud, and pay to use their own money? Why should merchants agree to pay extra if customers use cards instead of cash? In *Plastic Money*, Akos Rona-Tas and Alya Guseva tell the story of how banks overcame these and other quandaries as they constructed markets for credit cards in eight postcommunist countries. We know how markets work once they are built, but this book develops a unique framework for understanding how markets are engineered from the ground up—by selecting key players, ensuring cooperation, and providing conditions for the valuation of a product. Drawing on extensive interviews and fieldwork, the authors chronicle how banks overcame these hurdles and generated a desire for their new product in the midst of a transition from communism to capitalism.

What does it mean to be a woman? The current cultural ideal for womanhood encourages women to be strident, sexual, self-centered, independent -- and above all -- powerful and in control. But sadly, this model of womanhood hasn't delivered the happiness and fulfillment it promised. The Bible teaches that it's not up to us to decide what womanhood is all about. God created male and female for a very specific purpose. His design isn't arbitrary or unimportant. It is very intentional and He wants women to discover, embrace, and delight in the beauty of His design. He's looking for True Women! Bible teachers Mary A. Kassian and Nancy Leigh DeMoss share the key fundamentals of biblical womanhood in this eight week study. Each week includes five daily individual lessons leading to a group time of sharing and digging deeper into God's Word. And to enhance this time of learning together, on-line videos are available featuring Mary and Nancy as they encourage women to discover and embrace God's design and mission for their lives. *A True Woman Book* The goal of the True Woman publishing line is to encourage women to: Discover, embrace, and delight in God's divine design and mission for their lives. Reflect the beauty and heart of Jesus Christ to their world. Intentionally pass the baton of Truth on to the next generation. Pray earnestly for an outpouring of God's Spirit in their families, churches, nation and world.
