Work more effectively and gauge your progress as you go along! This Student Study Guide and Solutions Manual has been developed by the publisher as a supplement to accompany Incropera's Fundamentals of Heat & Mass Transfer, 5th Edition and Introduction to Heat & Mass Transfer, 4th Edition. It contains a summary of key concepts from each chapter, fully worked solutions to representative problems from the text and in many cases includes exploration of a solution over a range of values using the software package Interactive Heat Transfer, v2.0. This supplement is intended to help students focus on the key concepts from the text, verify their solutions by comparing them to the authors' own worked solutions and use computer tools to explore the behavior of the systems in question. Each worked solution follows the structured problem solving approach from the text. Comments throughout the solution help in explaining the thought process and a 'Comments' section at the end of each solutions discusses
