A lethal joyride into today's new breed of technogeeks, Coupland's forthcoming novel updates Microserfs for the age of Google. Ethan Jarlewski and five co-workers whose names start with J are bureaucratically marooned in jPod. jPod is a no-escape architectural limbo on the fringes of a massive Vancouver game design company. The six workers daily confront the forces that define our era: global piracy, boneheaded marketing staff, people smuggling, the rise of China, marijuana grow ops, Jeff Probst, and the ashes of the 1990s financial tech dream. jPod's universe is amoral and shameless. The characters are products of their era even as they're creating it. Everybody in Ethan's life inhabits a moral grey zone. Nobody is exempt, not even his seemingly straitlaced parents or Coupland himself, as readers will see. Full of word games, visual jokes and sideways jabs, this book throws a sharp, pointed lawn dart into the heart of contemporary life. jPod is Douglas Coupland at the top of his game. Excerpt from jPod: I slunk into the BoardX meeting where Steve, Gord-0, and staff from the loftiest perches of the food chain were still trying to nail the essence of Jeff the Charismatic Turtle. Prototype turtle sketches were pinned onto a massive cork wall, all of them goofy and teensploitational: sunglasses, baggy pants and (dear God) a terry-cloth sweatband. "Does Jeff the Turtle follow players around the entire time they manipulate their third person?" "Almost. Like Watson is to Sherlock Holmes." "Can you imagine how annoying that would be?" "Maybe the buddy isn't such a good idea." Steve squashed that hope. "It's going to be a buddy. Players will love it." "It's really Poochie-Joins-Itchy-and-Scratchy." "How am I ever going to look somebody who plays Tony Hawk games in the face again?" "Isn't our turtle supposed to be a bit more studly?" "Turtles aren't studly by nature." "What about the turtle they used in the 1950s to pimp the atomic weapons program? He was kind of studly." "No he wasn't and, besides, he's dead." "What?" "Dead. Hanged himself from the side of his posh midtown Manhattan terrarium. Left a note saying he couldn't handle the shame of what he'd done. Wrote it on a piece of Bibb lettuce."

Een programmeur van computerspeltjes heeft problemen op zijn werk en tot overmaat van ramp begint de schrijver van dit boek ook nog zijn leefwereld binnen te dringen.

This paper reviews tools used to identify and measure interconnectedness and raises the awareness of policymakers as to potential cross-sectional implications of prudential tools aimed at controlling interconnectedness. The paper examines two sets of tools-developed at the IMF and externally-to identify the implications of interconnectedness in systemic risk and how these tools have been applied in IMF surveillance. The paper then proposes a preliminary framework to analyze some key internationally-agreed-upon and national prudential tools and finds that while many prudential tools are effective in reducing interconnectedness, the interaction among these tools is far less clear cut.

Ethan and his five co-workers are marooned in Jpod, a no-escape architectural limbo on the fringes of a massive game-design company. There they wage battle against the demands of boneheaded marketing staff who torture them with idiotic changes to already idiotic games. Meanwhile, Ethan's personal life is being invaded by marijuana grow-ops, people-smuggling, ballroom dancing, global piracy and the rise of China. Everybody in both worlds seems to inhabit a moral grey zone, and nobody is exempt, not even his seemingly strait-laced parents or Coupland himself ...
