Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

The Communications Toolkit contains practical advice, tips and strategies to enable learners to develop the communication skills needed to be successful students. The text helps students make a successful transition to tertiary studies, develop effective research skills for their discipline, approach academic writing with confidence, refine their writing skills, and enhance their face-to-face communication experience. This new edition includes more information than ever on active listening and dealing with conflict, while taking into account the changing nature of university studies as more and more students study and take courses online. New examples of online students' communication work and new coverage of the communication challenges students face when going to university via an online channel deals with this diversity. The direct, inclusive, motivational and student-friendly text addresses both individual students and those working in seminar or workshop groups, and provides activities for both types of student throughout the book.
