principles irrespective of norms applied to layout and script types. This book will appeal to readers interested in manuscript studies, sociolinguistics, literacy studies, and history of writing.

Learning another language can often be a challenging task. Teacher and author Marianne Raynaud has developed an intensive program to aid teachers and students with materials that really work. Filled with unique and motivating activities, the ideas presented will help all teachers of foreign languages to assist their students to effectively and efficiently learn a new language. With more than twenty-four years of experience teaching, Raynaud details her philosophy and the techniques she has developed. The text is accompanied by a Digital Document Annex that includes more than 1,500 ready-to-use teaching materials focusing on listening, comprehension, grammar, vocabulary, and translations. The annex also contains PowerPoint presentations, audio recordings, short videos, and examples of student work. Chapters provide information about: Incorporating teamwork Establishing a core curriculum Individualizing teaching Helping students enjoy labs Writing exercises that correspond to student needs Providing a challenging workload Intended to help teachers establish a successful program, *QualityTime-ESL: The Digital Resource Book* provides an extensive toolbox of teaching materials from which teachers can freely choose and then adapt. This detailed guide will help teachers to create a dynamic learning course to further the teaching of English.

Demonstrates the principles involved in planning and designing an effective syllabus. This book examines important concepts, such as needs analysis, goal-setting, and content specification, and serves as a useful introduction for teachers who want to gain an understanding of syllabus design in order to modify the syllabuses with which they work.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

Script and writing were among the most important inventions in human history, and until the invention of printing, the handwritten book was the primary medium of literary and cultural transmission. Although the study of manuscripts is already quite advanced for many regions of the world, no unified discipline of "manuscript studies" has yet evolved which is capable of treating handwritten books from East Asia, India and the Islamic world equally alongside the European manuscript tradition. This book, which aims to begin the interdisciplinary dialogue needed to arrive at a truly systematic and comparative approach to manuscript cultures worldwide, brings together papers by leading researchers concerned with material, philological and cultural aspects of different manuscript traditions.

Mahmoud Darwish (1942–2008), recipient of France's Knight of Arts and Belles Lettres medal, the Lotus Prize, and the Lannan Foundation Prize for Cultural Freedom, is widely considered Palestine's most eminent poet. *State of Siege* was written while the poet himself was under siege in Ramallah during the Israeli invasion of 2002. An eloquent and impassioned response to political extremity, the collection was published to great acclaim in the Arab world. Munir Akash's translation, including an introduction exploring the rich mythology of these poems, presents the first book-length, bilingual edition of *State of Siege* to an English audience.

This book provides a model for specifying the syllabus content relevant to the differing needs of ESP learners.

Crystal-clear and comprehensive yet concise, this text describes the steps involved in the curriculum design process, elaborates and justifies these steps, and provides opportunities for practicing and applying them. The description of the steps is done at a general level so that they can be applied in a wide range of particular circumstances. The process comes to life through plentiful examples of actual applications of the steps. Each chapter includes: examples from the authors' experience and from published research tasks that encourage readers to relate the steps to their own experience case studies and suggestions for further reading that put readers in touch with others' experience Curriculum, or course, design is largely a 'how-to-do-it' activity that involves the integration of knowledge from many of the areas in the field of Applied Linguistics, such as language acquisition research, teaching methodology, assessment, language description, and materials production. Combining sound research/theory with state-of-the-art practice, *Language Curriculum Design* is widely applicable for ESL/EFL language education courses around the world.

The Arabic script in Africa is a collection of sixteen papers on the past and present use of Arabic script to write African languages other than Arabic, discussing the (ethno-)historical, (socio-)linguistic, and in particular grammatological aspects of such writing traditions.

Since the original publication of this book, available computer power has increased greatly. Today, scientific computing is playing an ever more prominent role as a tool in scientific discovery and engineering analysis. In this second edition, the key addition is an introduction to the finite element method. This is a widely used technique for solving partial differential equations (PDEs) in complex domains. This text introduces numerical methods and shows how to develop, analyse, and use them. Complete MATLAB programs for all the worked examples are now available at www.cambridge.org/Moin, and more than 30 exercises have been added. This thorough and practical book is intended as a first course in numerical analysis, primarily for new graduate students in engineering and physical science. Along with mastering the fundamentals of numerical methods, students will learn to write their own computer programs using standard numerical methods.
