Non-G lenses will have an aperture ring where the lens is attached to the camera. Set this this ring to the largest number, usually 22, if not 32 or 16. This number will be in orange on autofocus lenses. There usually is a lock to keep this ring set there, since if it comes off that setting you'll get an error message from the D50.

Don't have a CPU. AI-P: Manual AI-S Nikon lenses with a CPU that sends the lens information to the camera body.

## Nikon Camera and Lens Compatibility Chart

I just purchased a Quantaray 70-300 Zoom Lens for my Nikon D50. I was immediately struck by the fact that there is no instruction manual or an documentation that comes with the lens. In fact, I cannot even find a way to register the product. Before I even do that and decide whether or not I will even keep this lens, I am looking for some help.
