more with a comprehensive and strategic revitalization plan. Chronicling the struggle of local revitalization as organizers move from trial and error to effective revitalization strategies, Promoting Sustainable Local and Community Economic Development documents the current transformation in community revitalization from market-based incentives to mixed strategies of public sector learning, partnerships, and community capacity. Knowledge about the field and what works is growing, but not always publicized and readily accessible. This reference surveys the breadth of innovative place and people development practices, presenting lessons and examples

at a general and textured level, putting information about innovative ways to change, influence, and improve the economic development process within easy reach. Roland Anglin brings his unique vantage point to the topic; his experience as a practitioner and applied academic allowed him to see how community economic development practices grow over time in size, scale, and impact. He highlights the difference between what is now termed community economic development (CED) and traditional local economic development practice, specifically the priority placed on community involvement in economic development partnerships between the private sector and

government. The book includes case studies that demonstrate what has and has not worked in revitalization efforts, as well as how active public and private sector partnerships have been the most effective in revitalization efforts. A Resource Guide is included at the end of the book for readers who may want a more expansive understanding of community economic development.

Poverty declined significantly in the decade after Lyndon Johnson's 1964 declaration of "War on Poverty." Dramatically increased federal funding for education and training programs, social security benefits, other income support programs, and a growing economy reduced poverty and raised expectations that income poverty could be eliminated within a generation. Yet the official poverty rate has never fallen below its 1973 level

and remains higher than the rates in many other advanced economies. In this book, editors Maria Cancian and Sheldon Danziger and leading poverty researchers assess why the War on Poverty was not won and analyze the most promising strategies to reduce poverty in the twenty-first century economy. *Changing Poverty, Changing Policies* documents how economic, social, demographic, and public policy changes since the early 1970s have altered who is poor and where antipoverty initiatives have kept pace or fallen behind. Part I shows that little progress has been made in reducing poverty, except among the elderly, in the last three decades. The chapters examine

how changing labor market opportunities for less-educated workers have increased their risk of poverty (Rebecca Blank), and how family structure changes (Maria Cancian and Deborah Reed) and immigration have affected poverty (Steven Raphael and Eugene Smolensky). Part II assesses the ways childhood poverty influences adult outcomes. Markus Jäntti finds that poor American children are more likely to be poor adults than are children in many other industrialized countries. Part III focuses on current antipoverty policies and possible alternatives. Jane Waldfogel demonstrates that policies in other countries—such as sick leave, subsidized child care, and schedule

flexibility—help low-wage parents better balance work and family responsibilities. Part IV considers how rethinking and redefining poverty might take antipoverty policies in new directions. Mary Jo Bane assesses the politics of poverty since the 1996 welfare reform act. Robert Haveman argues that income-based poverty measures should be expanded, as they have been in Europe, to include social exclusion and multiple dimensions of material hardships. *Changing Poverty, Changing Policies* shows that thoughtful policy reforms can reduce poverty and promote opportunities for poor workers and their families. The authors' focus on pragmatic measures that have real

possibilities of being implemented in the United States not only provides vital knowledge about what works but real hope for change.

Experts discuss improving job quality in low-wage industries including retail, residential construction, hospitals and long-term healthcare, restaurants, manufacturing, and long-haul trucking. Americans work harder and longer than our counterparts in other industrialized nations. Yet prosperity remains elusive to many. Workers in such low-wage industries as retail, restaurants, and home construction live from paycheck to paycheck, juggling multiple jobs with variable schedules, few benefits, and

limited prospects for advancement. These bad outcomes are produced by a range of industry-specific factors, including intense competition, outsourcing and subcontracting, failure to enforce employment standards, overt discrimination, outmoded production and management systems, and inadequate worker voice. In this volume, experts look for ways to improve job quality in the low-wage sector. They offer in-depth examinations of specific industries—long-term healthcare, hospitals and outpatient care, retail, residential construction, restaurants, manufacturing, and long-haul trucking—that together account for more than half of all low-wage jobs. The book's sector

view allows the contributors to address industry-specific variations that shape operational choices about work. Drawing on deep industry knowledge, they consider important distinctions within and between these industries; the financial, institutional, and structural incentives that shape the choices employers make; and what it would take to make more jobs better jobs. "Since Mayor de Blasio launched the Housing New York Plan in 2014, New York City has accelerated the construction and preservation of affordable housing to levels not seen in 30 years. We are on track to secure more affordable housing in the first four years of the Administration than in any comparable period since 1978. The City has tripled the share of affordable housing for households earning less than \$25,000. Funding for housing construction and preservation has doubled, as have the number of homes in the City's affordable housing lotteries each year. Hundreds of once-vacant lots have affordable homes rising on them today. Reforms to zoning and tax

With many Americans striving to build their skills to get jobs in a rapidly changing economy, the workforce development field has seen a significant increase in sector strategies, which focus on the specific skills that employers need and address the real-world challenges facing low-income workers. Maureen Conway and Robert P. Giloth deliver a robust volume featuring perspectives from prominent nonprofit and philanthropy leaders, academics and researchers to capture how sector-based workforce

development, in industries ranging from health to construction, has evolved over 30 years — and how it can continue to grow and inform future investments and policy decisions. The book offers lessons for policymakers, philanthropic investors, researchers and local leaders interested in policies and practices that support strong businesses while helping struggling Americans connect to good jobs. *Connecting People to Work* features case studies of organizations implementing sector-based workforce development strategies in the health care, construction, manufacturing and restaurant industries, and highlights how policy and economic changes and

new practices among education and training institutions are affecting workforce development efforts. It also includes evaluation results and a review of major sector-financing strategies. The book discusses the need for these workforce strategies at a time when many people are out of work or underemployed and face a labor market that is difficult to navigate. Too many workers today earn too little to make ends meet, and they often lack the time or resources to participate in local education programs that may or may not help them find work. Many low-wage workers often need additional support as they go through training, an approach generally adopted by sector strategies. The results
