Radu Cinamar is recruited for Department Zero and explores the tunnel from the Bucegi Sphinx chamber to a similar chamber beneath Giza where a time travel device is found.

THE ETHERIC CRYSTAL - THE THIRD TUNNEL concludes both a numerological cycle (cycle 7) and offers the mystery of the last tunnel in the chamber beneath the (Romanian) sphinx, left unexplored by the author until 2015. After their expedition, this volume makes a very interesting turn, directing Radu to spawn special project which attracts a unique collaboration of characters, both from the underground city of Apellos but also with the American side. Also, for the first time in almost 14 years, Radu Cinamar offers us some additional conversations and collaboration with the enigmatic Elinor, the quintessential alchemist, who becomes deeply involved with the new project. The book also presents a key piece of information, long debated and considered until now an unsolved mystery, which refers to the real origin of the Moon. Everything is explained in chronological detail, following up on the elements about the origin of man presented in the previous volume, *Forgotten Genesis*. THE ETHERIC CRYSTAL is full of fascinating information that opens the horizons of our knowledge and of our individual evolution.

Radu Cinamar's sixth book is about his continued liaison with the Inner Earth civilization Apellos where he views certain key aspects of the history of Mankind by viewing holographic projections which are facilitated by a headset he wears featuring advanced technology that is able to interact with his cerebral cortex and intuition. The result is a compelling tale of how multiple extraterrestrial civilization influenced and steered the DNA of Mankind to evolve as well as the accompanying history which includes a description of ancient civilizations such as Atlantis, the building of the pyramids, the Egyptian Sphinx, Hyperborea and other interesting mysteries.

In this book, philosopher Paul Brunton (1898-1981) encounters the mysteries and magic of Egypt in the 1930s, including an eerie yet illuminating night spent alone inside the Great Pyramid. Alongside his explorations of ancient Egypt's monuments and gods, Brunton encounters a variety of occultists, fakirs, and dervishes, and even manages to become initiated into the deadly art of snake charming. His frank interviews with Muslim leaders remain relevant today, and his description of the Hajj reflects the beauty and inspiring faith of Mohammad's true followers. Brunton's journey to discover the furthest reaches of what the mind and body are capable of--and to distinguish various forms of yoga and magic from true spirituality--lead him to the myth of Osiris and to the mystery that is the Sphinx itself. In the end, Brunton turns his attention to his own spiritual path, connecting all of his

experiences into a single discovery: that we are more than the body and that the freedom of our spirit can be experienced here and now. This new edition has been updated to incorporate Brunton's final revisions and includes an introduction by the Paul Brunton Philosophic Foundation. "Paul Brunton was a great original and got to a place of personal evolution that illumines the pathways of a future humanity." --Jean Houston, author of *A Passion for the Possible* and *A Mythic Life* "Any serious man or woman in search of spiritual ideas will find a surprising challenge and an authentic source of inspiration and intellectual nourishment in the writings of Paul Brunton."--Jacob Needleman, author of *What is God?*

In this exhilarating description of mysteries inside the Earth, Radu Cinamar presents a unique way to penetrate the Inner Earth through the process of feeling and the effects that will develop from such an experience. To enhance the readers understanding of this very guarded subject, this book includes multiple illustrations that include depictions of Inner Earth geography. Familiar characters from the Transylvania Series also reappear, including the enigmatic Tibetan lama, Repa Sundhi, also known as Dr Xien, who states: If someone had a device or machine that could start up and go everywhere they want, especially towards the centre of the Earth, the machine would be blocked and stop at a certain point because of the frequency of vibration to be found there. Just how far you can go with such a machine can be limited by reason of your own consciousness which can in and of itself restrict the dimensional range of such a device or the extent to which it can penetrate other realms. This applies to both human beings as well as material objects. Your ability to access such a region is determined by what your own individual frequency of consciousness can or will allow you to experience. This is not only the story of an exciting adventure, it is an opportunity for initiation as you explore the frequencies of your own inner nature.

Sequel to *Transylvania Sunrise* wherein Radu Cinamar meets the Tibetan lama who orchestrated the discovery of ancient technology under the Romanian Sphinx

More than a breathtaking thriller, "The Guardian Angel" is an ambitious novel that captures the depth of the main idea: what is the price of life and especially how much are we willing to do and how far are we willing to go to survive? Is it possible we can fool our destiny? Can we cheat death?

Personal story of Preston Nichols and how radar was used to manipulate matter and time itself beginning with the Philadelphia Experiment and was further developed at Montauk. This edition includes the original text plus details over two decades worth of investigation leading to the scientific proof of actual time travel capabilities plus patent.

After chemists crystallised a new chemical for the first time, it became easier and easier to crystallise in laboratories all over the world. After rats at Harvard first escaped from a new kind of water maze, successive generations learned quicker and quicker. Then rats in Melbourne, Australia learned yet faster. Rats with no trained ancestors shared in this improvement. Rupert Sheldrake sees these processes as examples of morphic resonance. Past forms and activities of organisms, he argues, influence organisms in the present through direct connections across time and space. Individual plants and animals both draw upon and contribute to the collective memory of their species. Sheldrake, now Director of the Perrott-Warwick Project supported by Trinity College, Cambridge, reinterprets the regularities of nature as being more like habits than immutable laws. Described as 'the best candidate for burning there has been for many years' by Nature on first publication, this updated edition will raise hackles and inspire curiosity in equal measure.

New research and evidence that the Sphinx is thousands of years older than previously thought • Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch ' s water weathering research and Bauval ' s Orion Correlation Theory • Examines how the Sphinx is contemporaneous with Göbekli Tepe, aligned with the constellation Leo, and was recarved during the Old Kingdom era of Egypt • Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt, the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza. It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone. According to orthodox Egyptology, the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre. Yet this “ fact ” has scant to no supportive evidence. When was the Sphinx really built and, most importantly, why? In this provocative collaboration from two Egyptology outsiders, Robert M. Schoch, Ph.D., and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre-Pharaonic civilization. They examine the known history of the Sphinx, contrasting what Egyptologists claim with prominent historical accounts and new research, including updates to Schoch ' s geological water weathering research and reanalysis of seismic studies. Building on Bauval ' s Orion Correlation Theory, they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo. Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era, they assert that the Sphinx was first built by an advanced pre-Pharaonic civilization that existed circa 12,000 years ago on the Giza Plateau, contemporaneous with the sophisticated Göbekli Tepe complex. The authors examine how the monuments at Giza memorialize Zep Tepi, the Golden Age of legend shown here to be an actual historical time period from roughly 10,500 BCE through 9700 BCE. Moving us closer to an understanding of the true age and purpose of the Great Sphinx, Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age.
