Shaping and Routing You can use pins which thread into the shaper table insert, or a shaper fence when you use the Mark 7 for shaping or routing. However, we strongly recommend using the Optional Shopsmith Shaper Fence whenever possible, since it offers the most support for the workpiece and it provides more efficient dust collection.

## Under Table Routing and Shaping with the Double-Tilt System

In hydrology, routing is a technique used to predict the changes in shape of a hydrograph as water moves through a river channel or a reservoir. In flood forecasting, hydrologists may want to know how a short burst of intense rain in an area upstream of a city will change as it reaches the city. Routing can be used to determine whether the pulse of rain reaches the city as a deluge or a trickle. Routing also can be used to predict the hydrograph shape subsequent to multiple rainfall events in di

### **Routing (hydrology) - Wikipedia**

- Traffic shaping Traffic shaping is a technique used on high volume networks to ensure the timely delivery of prioritized traffic and provide optimal performance to the users. The network is managed and optimized to control the type and amount of traffic by prioritizing important traffic.
