The Big Shift: Navigating the New Stage Beyond Midlife ... In The Big Shift, Freedman bemoans the fact that the discussion about longer lives in America has been entirely about the staggering economic costs of a dramatically aging society when, in reality, most of the nation's 78 million boomers are not getting old — at least not yet. The whole 60- to 80-year-old period is simply new territory, he writes, and the people in this period constitute a whole new phenomenon in the 21st century.

The Great Shift is about the new era of humanity. We have entered the new epoch of humanity's spiritual evolutionary journey into higher consciousness. Our present world is one in which order is arising out of chaos. Everything is changing and seeking equilibrium. The conditions are nothing short of a rebirth. We are quite literally witnesses and participants in the shift from individual to planetary consciousness. We are part of the emerging consciousness, and the signs are everywhere. It is here now, and we all have a part to play in it. This book is a guide to navigating the shift from an old paradigm into a new one. It is deeply rooted in the shamanic and Taoist traditions, which are a fountain of wisdom and knowledge for restoring our relationship with the Earth. Shamanism and Taoism are a way of living in harmony with nature, rather than an adherence to a religious doctrine. By practicing these ways of being, we awaken our soul calling and our connection to nature. They provide a myriad of responses to the spiritual quest of self-discovery. They are ways that embed us in the living web of life, yielding greater awareness and perspective. These practices are easily integrated into contemporary life and provide a means of navigating the turbulent times in which we live.

In one of the most significant social trends of the new century, and the biggest transformation of the American workforce since the women's movement, members of the baby boom generation are inventing a new phase of work. Encore tells the stories of encore career pioneers who are not content, or affluent enough, to spend their next thirty years on a golf course. These men and women are moving beyond midlife careers yet refusing to phase out or fade away. As they search for a calling in the second half of life and focus on what matters most, these individuals stand to transform the nature of work in America. They also hold the potential to create a society that balances the joys and responsibilities of contribution across the generations -- in other words, one that works better for all of us.

How can you move most effectively from the pinnacle of business and leadership success into "post-work" life that energizes you, and leverages your experience and your interests? This book draws on the experience of several past CEOs to address the important topic of ' personal continuity ' for family business leaders transitioning from the day-to-day leadership of their enterprise. Making this transition remains challenging for most leaders. Lack of clarity or options for meaningful post-CEO roles is a major factor in succession struggles, resulting in wide-reaching consequences for all stakeholders in the enterprise. Here, family business consultant Brun de Pontet takes an in-depth look at the dynamics and challenges for leaders in transition and the systems around them, to deliver insights on sources of difficulty and tips and tools for effective planning. The book draws extensively on the experiences of more than a dozen former family business leader interviewees. These highly driven and accomplished business leaders share stories and lessons from their own personal continuity journey as they transitioned from the top of their companies. Combining these real examples with knowledge from years of consulting and research, Brun de Pontet helps leaders broaden their sense of self as they look forward to a rich, purpose-filled next chapter in life.
