Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

William Edward Burghardt Du Bois was a black civil rights activist, leader, Pan-Africanist, sociologist, educator, historian, writer, editor, poet, and scholar. He became a naturalized citizen of Ghana in 1963 at the age of 95. "The time has not yet come for a complete history of the Negro peoples. Archaeological research in Africa has just begun, and many sources of information in Arabian, Portuguese, and other tongues are not fully at our command; and, too, it must frankly be confessed, racial prejudice against darker peoples is still too strong in so-called civilized centers for judicial appraisalment of the peoples of Africa. Much intensive monographic work in history and science is needed to clear mooted points and quiet the controversialist who mistakes present personal desire for scientific proof. Nevertheless, I have not been able to withstand the temptation to essay such short general statement of the main known facts and their fair interpretation as shall enable the general reader to know as men a sixth or more of the human race. Manifestly so short a story must be mainly conclusions and generalizations with but meager indication of authorities and underlying arguments." - W. E. B. Du Bois

This is the full unabridged edition in a facsimile reprint, 436 pages. The object of the present book is in the tracing the course secret societies. I shall rely as far as possible on the documents and admissions of their members, on which point I have been able to collect a great deal of fresh data entirely corroborating my former thesis. It should be understood that I do not propose to give a complete history of secret societies, but only of secret societies in their relation to the revolutionary movement. I shall therefore not attempt to describe the theories of occultism nor to enquire into the secrets of Freemasonry, but simply to relate the history of these systems in order to show the manner in which they have been utilized for a subversive purpose. If I then fail to convince the incredulous that secret forces of revolution exist, it will not be for want of evidence. About the AuthorNesta Helen Webster (24 August 1876 - 16 May 1960) was a controversial historian, occultist, and author who revived conspiracy theories about the Illuminati. She argued that the secret society's members were occultists, plotting communist world domination, using the idea of a Jewish cabal, the Masons and Jesuits as a smokescreen. According to her, their international subversion included the French Revolution, 1848 Revolution, the First World War, the Bolshevik Revolution of 1917. In 1920, Webster was one of the contributing authors who wrote the The Jewish Peril, a series of articles in the London Morning Post, centered on the Protocols of the Elders of Zion. These articles were subsequently compiled and published in the same year, in book form under the title of the The Cause of World Unrest. She was cited respectfully by Winston Churchill, "This movement among the Jews ... as Mrs. Webster, has so ably shown, [played] a definitely recognizable part in the tragedy of the French Revolution" Webster claimed that the authenticity of the Protocols of the Elders of Zion was an open question. Her position on that, in 1924, "Contrary to the assertions of certain writers, I never affirmed my belief in the authenticity of the Protocols, but have always treated it as an entirely open question." She also believed she was a countess in a previous life, who was guillotined by French revolutionaries. At one time she was a member of the British Union of Fascists.

In seventeenth century Italy, overcrowding, violent political uprising, and plague led an astonishing number of abandoned and orphaned children to overwhelm the cities. Out of the piety of private citizens and the apathy of local governments, the system of conservatori was created to house, nurture, and train these fanciulli vaganti (roaming children) to become hatters, shoemakers, tailors, goldsmiths, cabinet makers, and musicians - a range of practical trades that might sustain them and enable them to contribute to society. Conservatori were founded across Italy, from Venice and Florence to Parma and Naples, many specializing in a particular trade. Four music conservatori in Naples gained particular renown for their exceptional training of musicians, both performers and composers, all boys. By the eighteenth century, the graduates of the Naples conservatories began to spread across Europe, with some 600 boys formerly in residence beginning to dominate the European musical world. Other conservatories in the country - including the Paris Conservatory - began to imitate the principles of the Naples' conservatory's training, known as the partimento tradition. The daily lessons and exercises associated with this tradition were largely lost-until author Robert Gjerdingen discovered evidence of them in the archives of conservatories across Italy and the rest of Europe. Compellingly narrated and richly illustrated, Child Composers in the Old Conservatory follows the story of these boys as they undergo rigorous training with the conservatory's maestri and eventually become maestri themselves, then moves forward in time to see the influence of partimenti in the training of such composers as Claude Debussy and Colette Boyer. Advocating for the revival of partimentii in modern music education, the book explores the tremendous potential of this tradition to enable natural musical fluency for students of all ages learning the craft today.
